

Did You Know?

- According to CDC, the death rate for children under 19 from COVID-19 is statistically 0% <https://covid.cdc.gov/covid-data-tracker/#datatracker-home>
-- Therefore, healthy children need not be vaccinated.
- According to CDC, not one healthy child has died of COVID-19 in the U.S. All children who have died with COVID-19 as of June 2021, had underlying comorbidities. <https://www.medpagetoday.com/opinion/marty-makary/93029>
-- Therefore, healthy children need not be vaccinated.
- According to CDC, the COVID vaccines will not prevent infection or transmission of COVID-19, <https://www.cnn.com/2021/08/05/health/us-coronavirus-thursday/index.html>
<https://www.youtube.com/watch?v=TKFWGvvlVLI>
<https://www.cdc.gov/coronavirus/2019-ncov/science/science-briefs/fully-vaccinated-people.html>
-- Therefore, the vaccines are not effective in stopping the spread of COVID-19.
- According to CDC, the contagiousness of vaccinated and unvaccinated persons infected with COVID-19 is similar. https://www.cdc.gov/mmwr/volumes/70/wr/mm7031e2.htm?s_cid=mm7031e2_w
-- Therefore, the vaccines are not effective in stopping the spread of COVID-19.
- According to CDC & FDA, COVID vaccines pose risks of myocarditis, blood clotting, neurological damage and death, to name a few, predominantly in adolescents. <https://www.cdc.gov/coronavirus/2019-ncov/vaccines/safety/adverse-events.html>
-- Therefore, the vaccines have significant risks.
- According to VAERS (Vaccine Adverse Effects Reporting System), excluding "foreign reports" to VAERS 9,136 deaths were reported in the U.S. between Dec. 14, 2020, and Dec. 3, 2021 in America. <https://openvaers.com/>
<https://vaers.hhs.gov/>
-- Therefore, the vaccines have significant risks.
- According to the WHO, there have been at least 2,457,386 adverse events world-wide. This is over 1,000,000 more cases than all adverse events reported over the last 53 years of all vaccines administered since 1968 combined (www.vigiaccess.org). [Search Trade Name of Drug: COVID-19 Vaccine](#)
-- Therefore, the vaccines have significant risks.
- According to the American Heart Association, the mRNA vaccines dramatically increase inflammation of the heart. https://www.ahajournals.org/doi/10.1161/circ.144.suppl_1.10712
-- Therefore, the vaccines have significant risks.
- According to historical medical data, 50% of people who get myocarditis will die of a heart attack or require a heart transplant within 5 years, especially children. <https://www.ncbi.nlm.nih.gov/labs/pmc/articles/PMC2519249/>
-- Therefore, the vaccines have significant risks.
